PROFILE

Computer Science and Engineering undergraduate at Bennett University with an interest in artificial intelligence, machine learning, software development, and data analytics. Combines technical curiosity with experience in graphic and visual design, and an interest in creating clear, user-friendly digital experiences.

EDUCATION

Bennett University — B.Tech, Computer Science and Engineering

2026–2030 (Expected)

St. Michael's High School — Schooling, Classes I–X

Class X: 92%

SELECTED PROJECT

Spotting the At Risk — Interactive Performance Dashboard
Developed an interactive dashboard concept to help identify at-risk students and employees using performance indicators, attendance, academic information, and related metrics. The project focuses on making data easier to interpret through visual summaries and dashboard-based analysis.

Live Dashboard • GitHub Profile

HACKATHON & ACTIVITIES

Hackathon Participant
Participated in a Microsoft-organized hackathon and contributed to building a project. Project work included developing a data-focused dashboard concept.

Technical & College Activities
Engaged in college technology and creative activities, including visual concepts and design work for student-club and event initiatives.

DESIGN EXPERIENCE

Graphic Design — School and College Projects
Created visual and graphic-design work across school and college activities, including poster concepts, event/stall visuals, and presentation-oriented designs. Interested in UI/UX, visual communication, and improving digital user experiences.

TECHNICAL SKILLS & INTERESTS

Programming: Python, C++, HTML, CSS, JavaScript (developing proficiency)

Tools & Data: Power BI, Git, GitHub, VS Code

Design: UI/UX, graphic design, visual design, presentation design

Areas of Interest: Artificial Intelligence, Machine Learning, Data Analytics, frontend development

Personal Interests: Gaming, art, and visual creativity
